Moritz Schlick (1882-1936): Editionsprojekt

Ziel dieses insgesamt auf 10 Jahre geplanten Forschungsprojektes mit einer vom
Fonds zur Förderung der wissenschaftlichen Forschung (FWF) geförderten ersten
dreijährigen Projektphase ist die Erstellung einer Kritischen Gesamtausgabe der
Schriften von Moritz Schlick sowie die Erarbeitung seiner intellektuellen Biographie.
Erstmals werden auch bislang unveröffentlichte Schriften inklusive Korrespondenz
der Forschung und Öffentlichkeit zugänglich gemacht.

Circle. A Companion to Empiricists. Hrsg. von Volker Thurm-Nemeth, Wien: WUV

Verlag 2003

Library and Documentation

Expansion of primary sources and research literature on the Vienna Circle and its
influence. Acquisition of estates and archival material in Austria and abroad.

Robert S. Cohen Collection and Archives: Robert Somé Cohen (b. 1924) is an
American philosopher, scientist and historian of science and philosophy who has
been editing the *Boston Studies in the Philosophy of Science* and organizing the
Boston Colloquium for the Philosophy of Science for many decades. The Robert S.
Cohen Collection contains correspondence, unpublished and published
manuscripts and typescripts, reprints, journal issues, news clippings, photographic
prints, sound recordings, memos and notebooks.

A substantial portion of the Robert S. Cohen Collection is being made available for
use by educators and researchers at the Institute Vienna Circle as the Robert S.
Cohen Archives. The Institute Vienna Circle will provide access to full-sized
photomechanical reproductions of documents selected from the Collection that offer
insight into the development of Logical Empiricism.

Adolf Grünbaum Archives: A similar acquisition is in preparation with the private
archives of Adolf Grünbaum, the founder and chair of the Pittsburgh Center for
Philosophy of Science.

Eugene T. Gadol Library: The research library of Eugene T. Gadol has been
dedicated to the Institute Vienna Circle in 2002 by his heirs and is available for
research.
